

WOMAN EMPOWERMENT

Our main objective is to enable woman to get their own identity, their own status and to dream, desire and strive to achieve their rightfull place in the society.

When RDO gets in contact with a village, the first step is to start a group of woman. They start saving money en learn about various transactions involved in finance and income generation activities. All caste and tribal women can become part of the group. On a weekly base the woman come together and discuss individual and community issues. All issues can be addressed. During the meeting members can apply to get a loan regarding income generation, domestic expenses and collective activities.

Livelihood Support and skill development training to women increase their access to resources, bargaining power in society and the opportunity to earn an income. It also helps reduce women's vulnerability by allowing them to insure against risk and to meet unexpected expenses.
