

## WASH Program

It is a development program focused on improving clean water access, safe sanitation, and hygiene practices—especially in rural areas, schools, and vulnerable communities.

### WASH activities include:

- Providing safe drinking water (borewells, piped water, water filters)
- Building and maintaining toilets (household, school, community)
- Promoting handwashing and hygiene awareness
- Solid & liquid waste management
- Improving menstrual hygiene management (MHM) in schools
- Preventing water-borne diseases and improving public health
- Impact:
  - Better health & reduced diseases
  - Improved school attendance (especially for girls)
  - Dignity, safety, and cleaner communities
